

The Internet - Getting on-line

Learn how to get online and use devices. We can help you to get online and to learn how to use smartphones, tablets, laptops and computers.

About this Activity

When we first meet we will have a 15 m chat with you to find out what it is you would like to be able to do, and what your interests are.

This will be followed by one-to-one sessions with a trained volunteer who will guide you through the different steps towards your goals. If you don't have access to the internet or devices at home, we can offer some free data and the loan of devices so that you can practice what you are learning throughout the week.

We also offer relaxed group learning sessions.

Accessibility Information

- We welcome all levels of experience. We aim to make our sessions friendly and comfortable for all. Don't worry if you know you need time to learn new things; we will go at your speed.
